SUMMARY

Computer Science student at Delhi Technological University with hands-on experience building real-time networked applications, data pipelines, and AI/ML systems. Interested in high-throughput backend engineering and fintech infrastructure, with a focus on delivering reliable, low-latency experiences at scale.

EDUCATION

Delhi Technological University	B.Tech in Computer Science & Engineering	8.75/10.00	2023–2027
Greenfields Public School	CBSE Class XII	92.6%	2023
Greenfields Public School	CBSE Class X	94.8%	2021

WORK EXPERIENCE

Consultant Intern – Delhi Police Public Library (LINK)	July – Aug 2025
– Assessed existing digital infrastructure and software workflows, identifying usability gaps and recommending concrete improvements through structured UI/UX evaluation	
– Leveraged data-driven analysis to support research initiatives under the Shikhar Organisation, improving community digital engagement outcomes	

PROJECTS

Connectify – Node.js, Express.js, React, MongoDB Atlas, Socket.io, JWT, Bcrypt (LINK)	Apr 2026
– Engineered real-time bidirectional messaging via Socket.io with event-driven architecture, online presence tracking, and live status updates across concurrent users; deployed at live URL	
– Secured backend with JWT authentication and Bcrypt hashing; designed MongoDB Atlas schemas optimized for low-latency message retrieval on a full-stack MERN system	
Bengaluru Traffic AI Prediction – LightGBM, Python, Pandas, Scikit-learn (LINK)	Jun 2026
– Built a LightGBM regression pipeline on 77K+ real traffic records for Flipkart Gridlock Hackathon 2.0, achieving OOF R^2 of 0.916 and a public leaderboard score of 89.66	
– Applied 5-Fold Group K-Fold cross-validation with early stopping across folds, ensuring robust generalization on unseen urban mobility data sourced from Bengaluru Traffic Police and MapMyIndia	

TECHNICAL SKILLS

Languages	: C, C++, JavaScript, TypeScript, Python, SQL, Kotlin
Backend & Networking	: Node.js, Express.js, WebSockets, Socket.io, REST APIs, JWT, Bcrypt, TCP/IP, HTTP
Frontend	: React.js, React Native, TailwindCSS, Zustand, HTML, CSS
Databases	: MongoDB Atlas, PostgreSQL, MySQL, SQL Server
AI/ML	: LightGBM, Scikit-learn, Pandas, NumPy, Feature Engineering, Cross-Validation
Cloud & Tools	: GCP, Cloudinary, Git, GitHub, Linux, Postman

ACHIEVEMENTS & EXTRACURRICULARS

LeetCode – 750+ Problems Solved, Max Rating 1744	
Strengthened problem-solving skills across data structures, algorithms, and system design	
Completed Google Arcade 2024 – Google Cloud Platform	July 2024 – Sept 2024
Completed 50+ hands-on labs covering cloud infrastructure, distributed systems , and data pipelines; earned 20 skill badges	
1st Position – Blog-a-thon – Microsoft Office, DLF Gurugram	July 2024
Winner of Microsoft Blog-a-thon; demonstrated strong technical communication and documentation skills
